Regression Test Report

1. Overview

This document summarizes the regression testing activities performed on the web application. The objective was to ensure that recent code changes have not adversely affected existing functionalities.

2. Test Environment & Build Info

• Environment: Localhost
• Browser: Google Chrome

3. Scope of Regression Testing

Regression testing was conducted on the following modules:

- Phone Add
- Phone Edit
- Phone Delete
- Phone View

4. Test Execution Summary

• Total Test Cases Executed: 10
• Passed: 6
• Failed: 0
• Blocked: 0

5. Tools Used

Manual execution tracked using Excel Sheets. No automation scripts were used.

6. Conclusion

All regression test cases passed successfully. No issues were identified in the tested modules. The application is stable and ready for deployment.
